Design Thinking

B. Sathwik Dars

2nd - Session

→ In this meeting, our mentor told us that the way we approached the problem was too solution focused. Instead he told us to be solution agnostic & therefore told us to conduct a primary & research, to find the root of the problem and understand it.

→ After the meeting I researched on the topic,

'Why do singers ignore early ~~signs~~ symptoms of vocal strain' in a ~~detailed~~ detailed manner, and found out the following :-

- Demanding tour schedules
- Long rehearsals
- Stage pressure & performance expectation
- Lack of effective monitoring tools
- Financial and contractual pressure.
