

4th Session

Sc24uae010.

Sathvic

Now that we finished the researching part of the topic, Sir now instructed us to begin working on the solution requirement. Since we are a team of 6, we decided to split into sub-groups of two each, and start ~~from~~ working on a solution requirement checklist. Also informed us that the solution must include all aspects such as the electronics, physical and other aspects of the design, and also keep an individual record as elaborately as possible. Finally we need to give a prototype that must work fully in theory.
